

JOB DESCRIPTION

Job Title: Software Programmer
Department: Audio-Visual Department
Location: Bristol

ABOUT US

Established in 1985, Internet Videocommunications has earned an international reputation for delivering world class Audio-Visual, Video Conferencing and Telepresence systems and services. For 35 years our award-winning company has received numerous accolades for exceeding standards of excellence. It is our emphasis on service quality, our attention to detail and our total commitment to our clients that has led Internet Videocommunications to enjoy long-term relationships with many hundreds of businesses across the public and private sectors.

Working out of our Bristol and Marlow offices in the UK we have provided Audio-Visual, Video conferencing and Telepresence solutions in over 35 countries to date. The company offers unrivalled experience and expertise. And, having forged strong alliances with all the leading manufacturers, we are truly independent.

We pride ourselves on being at the very forefront of the Audio-Visual and Telecommunications Industry. Our mission statement is to deliver best of breed Audio-Visual and Unified Communications solutions and we recognise that in order to achieve this, we need to invest in best in class staff. All our team undertake rigorous, on-going training courses and external examinations to maintain industry knowledge and skill-sets that are second to none.

Due to expansion and a strong order book we are hiring a Software Programmer to join our team in Bristol with immediate effect.

WHAT WE DO

Internet Videocommunications provides a comprehensive portfolio of Audio-Visual, Video conference and Telepresence systems and services all in house. Uniquely set up to take care of the entire end-to-end solution, we will manage the project from the initial consultation, system design and build, through to training and maintenance support.

MAIN JOB PURPOSE

- To learn the craft and all the skills required to become a first-class Software Programmer.

DUTIES

- Develop, configure and maintain software coding, in a range of programming languages (including Crestron, AMX and Extron), which enables intuitive control of audio visual products in order to meet the specific requirements of the Company's clients.
- Create, modify and enhance highly professional touch-panel UXDs and GUIs adhering to the Company's design software specifications, standards, templates and timetables.
- Produce concise software control documentation.
- Maintain accurate software support documentation.
- Ensure all software generated is backed up and stored as appropriate.

- Configure and assign network addresses to AV devices in preparation for client installations.
- Update firmware on AV products and screens.
- Create detailed and robust software test documentation and then test each AV product's functionality in conjunction with this to ensure that it works as expected by the client.
- Attend client sites to assist the audio visual installations and testing as required.
- Create instruction manuals and software operating instructions for client use as required
- Ensure safe working conditions and safe working practices are adhered to at all times.
- Be knowledgeable on and conversant with the Company's portfolio of solutions and services.
- Prepare for and successfully complete all tests and examinations to achieve the required industry and Company accreditations.
- Support the sales team with any pre- or post-sales technical advice and activities, as required.
- Provide ad-hoc duties as and when required by a Director.
- Maintain on a daily basis an up-to-date record of all activities and contact with clients and prospects through the Company's CRM database.

SKILLS & EXPERIENCE

The candidate will hold an Electronic Engineering qualification or equivalent. They will have a passion for audio-visual technologies within a cutting-edge industry. This role offers a tailored career development programme and would ideally suit someone with aspirations to create innovative software control solutions for some of the biggest names in industry. If you possess excellent communication skills, energy, drive and ambition and are looking to join a dynamic team, then please apply.

HOW TO APPLY

Please forward a covering letter and up to date CV to Tanya Condon, HR Manager at Internet Videocommunications Limited at tcondon@internet-video.co.uk. Closing date for applications is Monday 30th March 2020.
