Completed Carbon Reduction Initiatives

As the 2021/2022 period has been a baseline year for Internet Videocommunications, it is not yet possible to record what carbon emission reduction is currently being achieved.

Over the next 12 months, it is expected that the following environmental management measures and schemes will be implemented and these will each contribute to a quantifiable carbon emission reduction:

- **Promote greater adoption of video communications to reduce travel**
- **Renew the Company's ISO 14001 certification**
- **Consolidate the number of Company offices**
- **Gifting of surplus office furniture to a carbon neutral company that will re-use and re-home it rather than put in landfill.**
- **Implementation of energy efficient lights in our remaining office**
- **Continue the migration to electric vehicles**
