

CARBON REDUCTION PLAN

Publication date: 10th September 2024

Commitment to achieving Net Zero

Internet Videocommunications Ltd is committed to achieving Net Zero emissions by 2046.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 01 / 08 / 2021 – 31 / 07 / 2022	
Baseline year emissions: 82.01	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	25.85
Scope 2	23.00
Scope 3 (Included Sources)	33.16
Total Emissions	82.01

Key:

Scope 1 – Direct Emissions from company facilities and Fleet Vehicles

Scope 2 – Indirect Emissions such as Purchased Electricity, Heating and Cooling

Scope 3 – Indirect Emissions such as Company travel, Staff commutes and Waste

Current Emissions Reporting

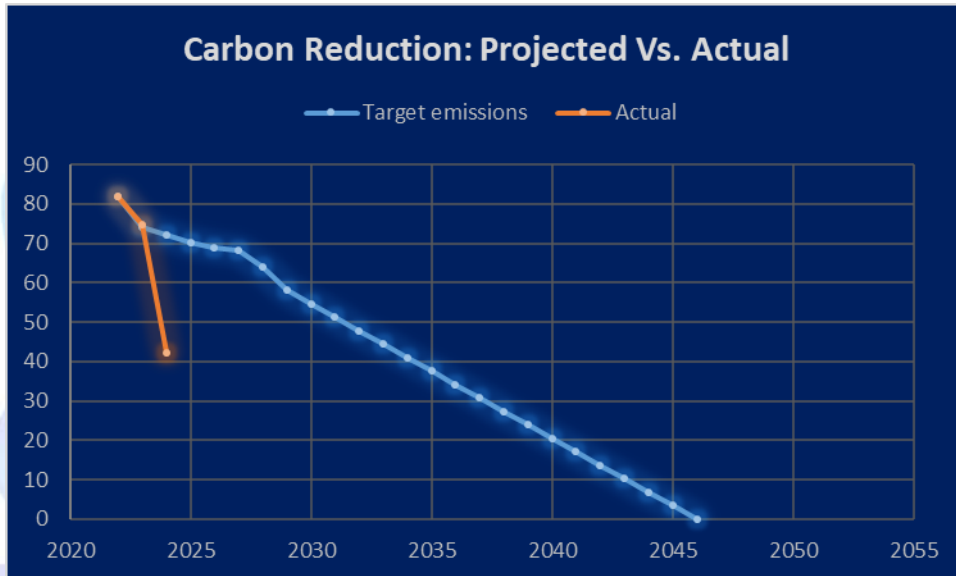

Reporting Year: 01 / 08 / 2023 – 31 / 07 / 2024)	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	11.02
Scope 2	11.52
Scope 3 (Included Sources)	19.82
Total Emissions	42.36

Emissions reduction targets

It is to be noted that over the last 12-month period, due to a greater emphasis on work taking place within the UK rather than overseas, air travel has reduced contributing to a significant reduction in the Company's total emissions. It is expected that air travel may increase in the years ahead but, in continuing our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions, over the next five years, will total **58.07 tCO₂e** by **2029**. This is a reduction on the Baseline Emissions Footprint of over **29%** and keeps the Company ahead of its overall target.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

- Promote greater adoption of video communications and home working to reduce travel.
- Renew the Company's ISO 14001 certification.
- Implementation of energy efficient lights.
- Continue the migration to electric vehicles
- Promote charitable gifting of surplus office furniture and audio-visual equipment so that it may be re-purposed.

Over the next 12 months, it is expected that the following environmental management measures and schemes will be implemented and these will each contribute to a quantifiable carbon emission reduction:

- **Continue to promote greater adoption of video communications to reduce travel (growth in hybrid working across UK businesses has accelerated this).**
- **Renew the Company's ISO 14001 certification.**
- **Continue the migration to electric / hybrid vehicles.**
- **Promote cycling, car-sharing and the use of public transport on business trips and journeys to and from work.**
- **Review office electricity and gas consumption/contracts with a focus on energy efficiency.**

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
