CARBON REDUCTION PLAN

Publication date: **10th September 2026**

Commitment to achieving Net Zero

Internet Videocommunications Ltd is committed to achieving Net Zero emissions by 2046.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 01 / 08 / 2021 – 31 / 07 / 2022	
Additional Details relating to the Baseline Emissions calculations: There were no previous baseline calculations	
Baseline year emissions: 82.01	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**25.85**
Scope 2	**23.00**
Scope 3 **(Included Sources)**	**33.16**
Total Emissions	**82.01**

Key:

Scope 1 – Direct Emissions from company facilities and Fleet Vehicles

Scope 2 – Indirect Emissions such as Purchased Electricity, Heating and Cooling

Scope 3 – Indirect Emissions such as Company travel, Staff commutes and Waste

Current Emissions Reporting

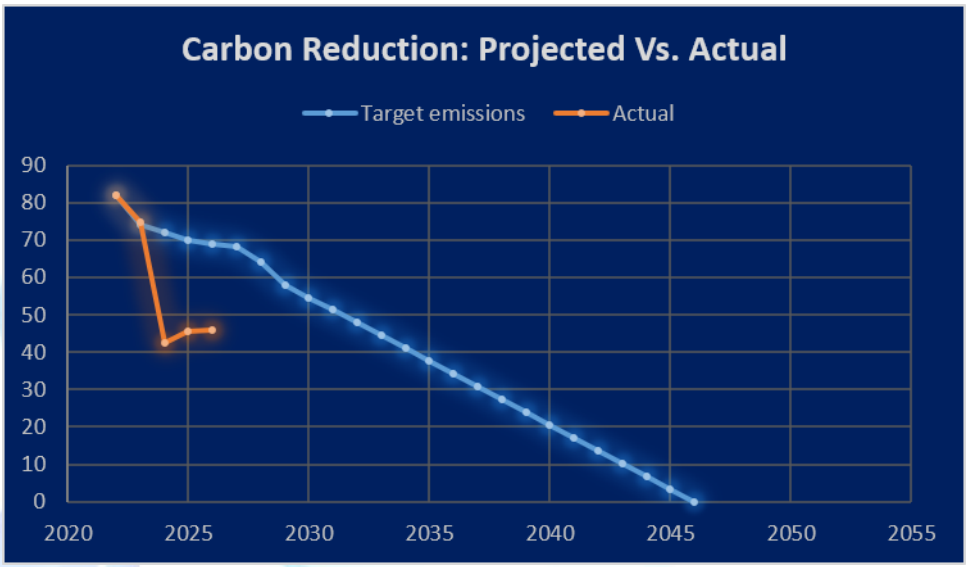
Reporting Year: 31 / 08 / 2025 – 31 / 08 / 2026)	
EMISSIONS	**TOTAL (tCO_2e)**
Scope 1	**15.51**
Scope 2	**12.87**
Scope 3 **(Included Sources)**	**17.37**
Total Emissions	**45.75**

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions, over the next five years, will total **51.23** tCO_2e by **2031**. This is a reduction on the Baseline Emissions Footprint of over 37%.

Progress against these targets can be seen in the graph below:



Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022 baseline.

- Consolidation of the number of Company offices
- Gifting of surplus office furniture to a carbon neutral company that will re-use and re-home it rather than put in landfill.
- Implementation of energy efficient lights in our head office
- Promote greater adoption of video communications and home working to reduce travel.
- Renew the Company's ISO 14001 certification.
- Continue the migration to electric vehicles
- Implemented separate disposal stations for recycling and food waste to ensure that recyclables do not end up in general waste

The carbon emission reduction achieved by these schemes equate to 36.26 tCO2e, a 37%ge reduction against the 2022 baseline and the measures will be in effect when performing the contract

Future carbon reduction initiatives

Over the next 12 months, it is expected that the following environmental management measures and schemes will be implemented and these will each contribute to a quantifiable carbon emission reduction:

- **Continue to promote greater adoption of video communications to reduce travel (growth in hybrid working across UK businesses has accelerated this).**
- **Renew the Company's ISO 14001 certification.**
- **Continue the migration to electric / hybrid vehicles.**
- **Promote car sharing on business trips / journeys to and from work.**
- **Continue to review office electricity and gas consumption and contracts.**
- **Weekly audit on fuel card prices to ensure the best most efficient fuel is used**
- **Promote staff cycling to work**
- **Move away from hard copy documents to digital storage and electronic signatures**
- **Consolidate the number of office printers (with the aim of reducing printer cartridges and a reliance on paper)**

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
